

Virtual Rental Studio

Fully equipped rental studio for your virtual production

For customers without own production facilities we offer a fully equipped rental studio at Düsseldorf. The rental studio is immediately ready for broadcasting: Virtual recordings are possible directly and at any time. Studio decoration is not necessary, as the set is virtual. Our 3D-Designers gladly provide a set design for you: No matter whether you record a newscast, an advertising spot or a music clip – your creativity and fantasy has no limits. You can work with two tracked and

mixed HD-720p50 cameras, after the virtual set is loaded. Director, camera and talent act the same as during a conventional shooting since the virtual environment is generated in real-time and visible to everyone. Our high performance rendering system VectorLE guarantees optimal production results. The rental studio is also meant as a demo-studio. Feel free to extensively test our rendering system and equipment – if it convinces you, we will build an identical studio at your location for you.

Immediately ready to broadcast. No studio decoration necessary, as the set is virtual.

New room for action.
